

Access Rights Inspector *Effective Rights Reporting*

NetVision

Key Benefits

Intelligent

Calculates permissions based on group memberships, inherited rights, object ownership, share permissions, and more.

Powerful

Reports on permissions across numerous servers and file shares. Works across multiple security domains.

Automated

Reports can be saved and scheduled for export and/or email. Eliminates manual processes and reduces cost.

Simple

Easy to use interface requires no in-depth training or prerequisite knowledge.

Flexible Reporting

Flexible report builder enables relevant, focused results providing real-world answers.

Platforms

Microsoft Active Directory

Microsoft Windows

NTFS CIFS File Shares
(NetApp & EMC)

Calculated. *Real world answers.*

Windows file system permissions are complex. Understanding which resources a group can access or who has permissions to modify a file is near impossible without help. And maintaining a secure, compliant environment means you need those answers. Access Rights Inspector provides quick, easy answers to critical access rights questions.

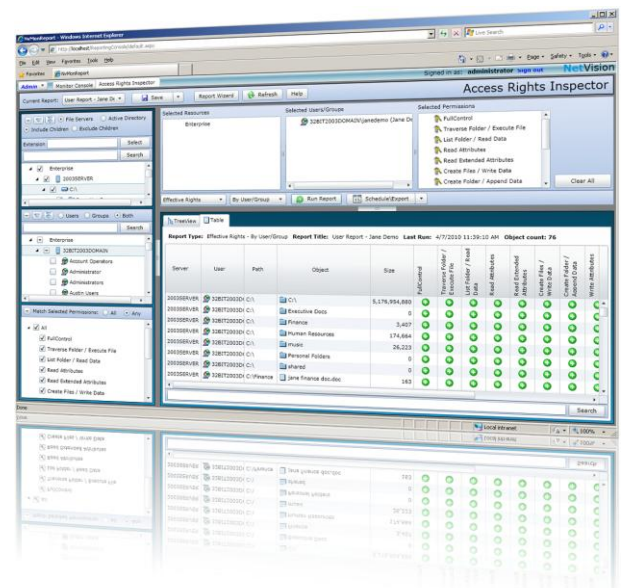

Access Rights Inspector report types include:

- Effective Rights Reporting
- Explicit Rights Reporting
- Direct User Rights Assignments
- Denied Permission Assignments
- Active Directory Delegated Permissions
- Security Group Memberships

Access Rights Inspector provides a powerful platform for answering critical questions about access rights in Active Directory and Windows-based file system resources. It accounts for the variety of rights assignment vehicles in use across the network.

Flexible Answers

Access Rights Inspector's flexible interface enables reporting of access rights via multiple methods such as an expandable server tree view. And reports are easily modified and exported to a variety of file formats.
